MAXIMIZING GROWTH

JAWA Software Money & Markets Point Of Sale (POS)

JAWA Software Money & Markets Point Of Sale has won many international awards from several IT companies around the world. It was certified by IBM as Store Proven and “Ready for Retail Innovations”

JAWA Software POS Management System is specifically developed for companies with high volume sales and diverse retail concepts. JAWA POS can cater to Supermarkets, Entertainment Companies, Consumer Electronics, Pharmaceutical and Fashion Companies.

JAWA Software POS has a unique design never seen in the IT market before. It offers the customer a Retail Framework allowing users to design all the screens and reports the way they want. Each design is called a template and the system can have unlimited number of templates each for one part of the business. Your company can have a fashion stores and several hardware stores and a number of restaurants. All of these concepts can be handled by one platform

JAWA Software POS is totally integrated between the Back of House and the corporate applications like Sales & Distribution, Financial Accounting and HRMS. We even have a mobile sales tracking system that allows you to view sales by location, year, month and date.

Your company does not need to buy each solution from a different company then try to put things together. Only this solution isn't a figment of your imagination. You don't have to be a big enterprise with deep pockets to afford it. It's called Money & Markets Retail ERP from JAWA Software, and we guarantee it will change the way you think, work, and imagine.

flexible solutions for your business needs

Any Shape

Any Color

Any Design

Any Function

Any Language

UNIQUE DESIGN

JAWA Software POS is unique in its design and flexibility never seen before in the IT industry.

The user can easily design the screens for each brand on business concept in a different way than the other. Leveraging from the brand or store design themes and colors. Your company can have a branded clothing stores having one POS design and several supermarkets or restaurants having a different POS design all under one platform.

The user can easily create a template with many screens and can opt to show item picture, customer loyalty points, credit limit, item warranty (needed for TV, laptops, etc....) and the needed upsell message for each item. These upsell messages are entered by the sales or brand managers team in the JAWA Software corporate head office Retail ERP system and can be different for each item and the system synchronizes these messages with the POS.

VIDEOS & ADVERTISING

Your company can leverage the JAWA Software POS to pass videos and other sales or advertising messages to the customer while the transaction is being recorded.

WHAT IS ON SALE

JAWA Software POS can be used as a kiosk to help customer quickly find items that are on sale.

MULTIPLE LANGUAGES

JAWA Software POS allows you to place multiple languages on the same screen buttons. Or you can define a several POS templates each having one language and direct the user from the security module to a specific screen having his preferred language

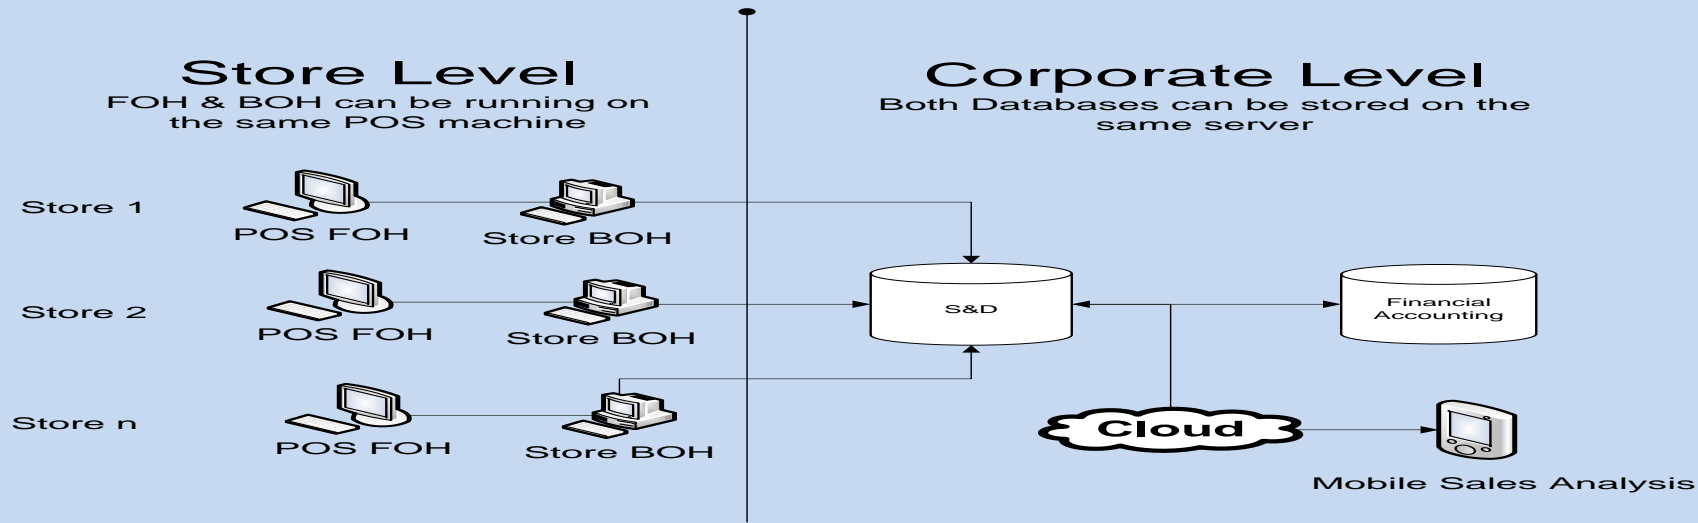

Unique features never seen before in the retail world

Technology at work for you

POS Connectivity

POS has two modules

FOH (Front Of House)

BOH (Back Of House)

Both FOH & BOH can be installed on the same computer. Each store can have many POS FOH

Sales & Distribution (S&D) synchronizes information from each store at a set interval. The interval is user defined. During the synchronization process the S&D System sends to each store any new items, price updates, promotions and loyalty information. POS sends sales transactions to the S&D application.

If the connection is lost with the S&D each store will continue to run without any interruption.

S&D creates journals in the JAWA Software Financial Accounting application.
